

## OO Terms

- |                              |  |
|------------------------------|--|
| <b>1</b> Object              | <b>16</b> Superclass                                       |
| <b>2</b> Identity            | <b>17</b> Subclass   |
| <b>3</b> Attribute           | <b>18</b> IS-A/Kind-Of relationship                        |
| <b>4</b> Attribute Values    | <b>19</b> Instantiation                                    |
| <b>5</b> Behaviour           | <b>20</b> Instance/Direct Instance/Indirec Instance        |
| <b>6</b> Operation           | <b>21</b> Inheritance                                      |
| <b>7</b> Method              | <b>22</b> Multiple Inheritance                             |
| <b>8</b> State               | <b>23</b> Foundation Classes                               |
| <b>9</b> Relationship        | <b>24</b> Specialization                                   |
| <b>10</b> Classification     | <b>25</b> Polymorphism                                     |
| <b>11</b> Encapsulation      | <b>26</b> Abstract Method                                  |
| <b>12</b> Concept/Class      | <b>27</b> Abstract Class                                   |
| <b>13</b> Abstraction        | <b>28</b> Properties                                       |
| <b>14</b> Generalization     | <b>29</b> Part-Of Relationship: Aggregation Vs Composition |
| <b>15</b> Information Hiding | <b>30</b> Interface  |
